

Three coverage records; the fixed six-case run remains incomplete

Four new attempts · one task/frame check failure · two historical support blocks · no learning or committed cuts

- Legacy access crop

Target-local crop
- Whole-source coarse (union matches)

Center interpolation domain
- Full-cell extent

Panels B-D average all 78 emitted proposals per completed case, including rejected proposals. Accepted counts are shown separately.
Grid-domain visibility does not establish tissue evidence, complete-tool visibility, clearance, resection feasibility, or model accuracy.
